

<p>Welcome and Introduction</p>	<p>Welcome to the Water Smart Curriculum for students TK-2nd grade. This is an interactive curriculum designed with multiple ways to participate. Students and families may participate together, students may participate independently and/or classroom teachers may integrate it into their classroom instruction. The purpose is to educate students and families on how to be safe around water and to keep children safe. Utilizing this curriculum over several years will ensure they receive this important information multiple times.</p>
<p>Curriculum</p>	<p>The curriculum is divided up into three areas: Engage: Here you will find links to read aloud books on water safety. Explore: Here you will find videos and interactive games on water safety. Apply: Here you will find a short quiz (Google Form) for students to take.</p> <p>Here is a link to the curriculum and it will automatically force a copy for your records. This will enable you to make copies for each individual class. Water Smart Curriculum</p>
<p>Apply</p>	<p>The short quiz is designed to reinforce and review the Water Smart concepts. This Google Form must be linked to the Water Smart Curriculum landing page under Apply (Click here) Below is the link that will require you to make a copy. Water Smart Quiz</p>
<p>Certificate</p>	<p>The certificate should be sent home via email or paper copy to each child. It contains a QR directing families to the nearest public swimming pool for lessons. It can also act as a reminder to be safe around water.</p> <p>The certificate will automatically populate if you use the Google Add on Autocrat. This is a very easy way to distribute the certificate. Please check your district protocols regarding the distribution of emails. Autocrat Tutorial</p>
<p>Parent Follow-up</p>	<p>This curriculum was designed to educate the entire family. Below is a feedback form for parents. Did the parents learn from the curriculum and what behaviors did they change? Parent Follow-up Form</p>
